

Primary Science

The page features decorative geometric patterns at the top and bottom. The top pattern consists of overlapping triangles in shades of yellow, green, and purple. The bottom pattern is more complex, including a red cross, a yellow crown, a green plant, and a blue teapot, all set against a background of colorful triangles.

Objectives:

To develop pupils' scientific literacy with a solid foundation in scientific knowledge.

To foster pupils' curiosity, imagination and desire for knowledge about the world and their surroundings through "hands-on and minds-on" scientific inquiry activities.

To encourage pupils to apply scientific knowledge and skills to solve problems in daily lives for enhancing scientific and creative thinking.

To promote Inquiry-based Science Learning through regular lessons, school activities and other learning opportunities.

To align with the ongoing renewal of the school curriculum and promotion of STEAM education so that Science education can meet pupils' needs and social development; better preparing them for future opportunities and challenges.
