

Having fun at school

2B Jeffrey Poon

Cross-Subjects Activities Day was held on 9th November. I had so much fun on that day. All primary one to six classmates joined the activities.

The activities were held in school covered playground, classrooms and school hall. There were question game booths in the covered playground. I played the games and won many reward stamps! I made the hand crafts in the classroom and I made a paper policeman. I also listened to the songs in the music room.

I had so much fun at these school activities because I could play and learn different knowledge in the games. The happiest thing was that I could redeem the big fishballs and pancakes with my reward stamps. I loved this fun school day!
